

1566

# A new Almanach

and Prognostication, scrvyng the years of  
Chryste our Lorde. M. D. lx. vi. Diligently.

calculated for þe Longitud of London, and  
pole articke of þe same. By VVilliam

Cunyngham Doctor in  
Philisicke.

PRINTED AT LONDON

by Richard Serll, for VVilliam Ihones,  
dwellyng in crede Lane and at  
to be sold at his shope  
at þe west end of Bowles.

1566.

# A brefe declaration and

rehearsal of all suche thinges as are conteyned in  
this present almanack, 1566.

The Golden number,

The Circle of the Sunne.

The Dominicall letter.

Betweene Christmas and Whouetyde viii. weekes  
and v. dayes.

Ashwednesday, the xxiij. of Februarie.

Ester daye, the xiiij. of Aprill.

Rogation dayes, beginne the xij. of Maye.

Ascension day the. xxiij. of Maye.

Whytsondaye the. seconde of June.

The vertue attractiue where as nede requieth is  
not alittel increased if you minister medicines con-  
uenient for the same at such time as the moon is in  
Ariete, Leone, Sagitario,

In like maner the faculty retentive: she hauing her  
course in these signes, Tauro, virgine, Capricorn

Also to minister digestiues, you may aptly do it when  
as the moone is in Geminis, Libra Aquario.

And the vertue expulsiue is augmented if you giue  
purgine medicines in Cancro, Scorpione or Pis-  
cibus,

Bu

### A brefe declaration.

But as touching convenient tymes for Phlebotomye and letting of blode if great necessitye bothe not contrary require, (for then the indication taken of the tyme, is not so much to be regarded) is in this sorte. You shall not open a vayne when there is any yll aspect of one planet to another: neither when as the moone is founde in the Lion: neither shal you open a vayne in that parte where as the moone is founde that season. And touching the dyuersitie of tymes taken according to the temperatures & complexions: they vse for coloryke constitutions Cancro Scorpione or Piscibus. For flegmatike, Ariete or Sagitario, like as for malancolike complexions the signes conuenient are founde Libra & Aquarius. But for the playner and easier vnderstandyng how the moone in euery sing gouerneth the partes of manes body you shal read these fewe verses folowynge: and marke the picture of this Anotomie.

2134, 50 Mar. Ch. 10.

5932

## The verses:

Aries the head & Taurus the necke guide:  
 Gemini armes Cancer stomake and breast,  
 Leo the hatter, Virgo the belly syde:  
 Raynes, natuell and burtookes, Libra Youe best,  
 Scorpious keperh Secretres sure in his chest,  
 Sagittarius theis the Goate knees doe craue:  
 Aquarie: Pisces the feet will haue.

## A brefe declarati on.

You shall mozcouer the firſte daye of euery month ſynde the riſyng and ſettinge of the ſunne. And when he entreth any of the celeſtyall ſyghes in the Zodiake.

Alſo the ſigne, dig: ee, & minut in which the moone is euery daye at noone her motion being reduced to the meridian of London. In lyke maner are the changies, full and quarters, of the Mooue.

Ther is further ſet out the beginnyng and endes of the tearmes and other profitable thinges whiche in reading you ſhall eaſely ſynde.

### Of the Eclipse of the Moone

this yeare 1566.

Ther ſhal be ſene in our Horizon this yeare of Chriſt our Sauis our 1566 þ xxxiii day of October at 5 of the clock xxiii minutes, an Eclipse of the Moone the then hauinge his courſe in thee x.iiii. degree. xxx.i minutes of the ſigur

A brefe declaration.

# A PROGNOSTI-

CATION FOR THE YEARE

of our redemption. 1566 made for

the Longitude and Pole of London,

By Vvilliam Cunyngham

Doctor in Phisique.

IMPRINTED AT LONDON

by Richard Serl. for William Iohnes,

dwelling in Credz lane and are to be

Sould at his Shoppe at the welles

ende of Poules.

1566.

PROGNOSTIC

OF THE YEAR 1800

AND THE SEASON OF 1801

BY J. H. P. DE LAUNAY

OF THE FRENCH INSTITUTE

AND OF THE ACADEMY OF SCIENCES

PRINTED AT LONDON

BY J. H. P. DE LAUNAY

AND J. H. P. DE LAUNAY

OF THE FRENCH INSTITUTE

AND OF THE ACADEMY OF SCIENCES

1800

To the freindly Reders.

**A**s Noble artes & sciencies haue rewarded ther  
worthy professours with Fame & renowne,  
soon y<sup>e</sup> other side, ignozant Artiffes haue broughte  
bothe ther artes, and them selues to Ignomyne, &  
Shame. which thing to be trew, although Plurique  
haue selte, yet that deuine Science, which teachith  
both the meruaylus motions. and also influence of  
the heauenlye bodyes, can aparantlye witnes for  
what Inuectiues both by mouth, and penne, hath  
bene agaynst His made through the offence of  
bustardly blockheads, my Astrologicall Apologie  
doth vtter. and selue men I thinke be therein igno-  
zant, But perseining the like Errours to solow in  
the woorkes, of diuers, of these Ignozant, & raiſe,  
Prognosticatours, this yeare 1566. I bothe haue  
published myne in Engliſhe, to serue the vnlernd  
multitude: and also in Latine for two yeares next,  
inſewing, for the Lerved sorte. in whiche woork, is  
not only obseruid a methode in prognosticating,  
but also the causes are set out, by which we gather  
the effectes. and I haue made it for two yeares, for  
that and if they will nedes prognosticate, they may  
haue the next yeare some better helpe then before.  
But my long prouised Chronographie shal not on-  
ly show them the whole arte bothe of calculating, &  
motions of the planets, with the rising and setting

**T**here shall be sene in oure Horizont this  
yeare of Chyiste our sauntour. 1566. the xxviii.  
daye of October at v of the cloke. xxviii. minu-  
tes an Eclipse of the moone, she then hauing her  
coulse in the riist digre, xxvi. minutes of the signe.  
Taurus nere the Dragons taile, the beginning of  
this Eclipse shall be with vs at Londo and playes.  
hauing the same meridian at foure of the cloke xi.  
minutes after diner, although as then she shalbe  
vnder our horizont and therfore not sene of  
vs. she shal be at hir greatist darknes at v. of the  
cloke xxviii. minutes, at which time she shal apere  
aboue the yearth al darkened, and from henc forth,  
hir darknes shal moze & moze deezease, so that at vi.  
of the cloke hir Eclipse shall be endyd. The  
bignes of this Eclipse, is xxviii. pointes the whole,  
tyme from the beginning to the ende almoste .ii.  
houres.

Of the 4. Quarters of the yeare, and  
firste of vvinter.

**W**inter which conteineth in it Decēber January  
& Februarie, shalbe altogether extreme could  
abounding with rayne, snow, froste, & tempestuous  
windes. wherfore ther shal many infirmities ware  
rise .as Angina, Pleurices, Lippitudines. tusses.  
Peripneumonia, and diuers agevves, also women w  
Childesh albe in perell to trauel befoze there betwe  
tyme,

Of the spring tyme.

**T**he spring tyme comprehending, March, Aprill, & May, shalbe could, raynye, tempestuous, & sharpe and that chesly abought the beginnig and towarde the ende. so that the sickenes of the winter. season shall reigne also this quarter, & to thes rehearsed adde the induration of the Spilte, payne in the Joyntes, & the flure of raw humours to y<sup>e</sup> month, lungen and Joyntes consell, therfoze in tyme for thy preservation, with some lerned and experte Physician

Of Sumer the third part of the yeare.

**S**omer which hath June, July, and August this yeare shall kepe his nature: it shalbe very whoot Lightnig thounder and some tempest as in my laste Prognostication, you may see set out at large. ther shal springe this season sharpe, and perilous infirmities as Causones. Dyfenterie, lyenteria Febres pestilenciales & si que sãnt generis iusdem

Of Autumne the laste parte  
of the yeare.

**A**utumne hauing September October, & Nouember, although it doth begine temperatly, yet returning to his owne nature shall not a litle rage for he shalbe now hote now could most, dry, sayer, tempestuous and to cõclude the tyme shalbe more  
varyable

riable, then the Chamclion, how therfoze can it be  
otherwise but that deseases, as well belonging to  
thys time, as of al other tymes, shal also reigne this  
quatter.

# The disposition of the
